

P. J. PROBY

20th Century Hits – Volume 1

Record Label: Select Records
Digitally Distributor: K-Tel Entertainment (UK)
iTunes Release Date: 1 October 2008

- This album offers listeners a selection of some of P.J. Proby's favourite songs from the last century. It's a mix of love songs, country and rockers. All tracks originate from recording sessions Proby has independently produced since the start of the new millennium under his own record label Select Records.
- Quote from P.J. Proby: *"I like sometimes to go back in time and take you out on a blind date, listening to some of the classics, that had me singing along to over the car radio, back when "what they laid down from the heart" was what ya got. I've tried to bring a touch of this to you with my most recent album "20th Century Hits".*
- The release of this album on iTunes stores world-wide heralds a new chapter in the singer's career as he finally makes his mark on the world-wide-web with this release and also his first official website (www.pjproby.net).
- A 2nd volume of recordings is to be mastered & prepared for release in due course.
